XLAB Steampunk

Your Go-To Partner for Integrations
into Red Hat Ansible Automation and Red Hat CloudForms

Unified Automation and Management of Hybrid Infrastructure
### FOR

Independent software vendors

System integrators

Solution providers

XLAB Steampunk

NetApp · VMware vCD · VMware · Nuage · Redfish · AWS · K8s · Google Cloud · Azure

**Red Hat Ansible Automation
Red Hat CloudForms**

Red Hat Ansible Automation modules

✓ are designed and developed adhering to the Ansible philosophy. Customer use cases are always considered first.

✓ are supported and maintained, following Red Hat Ansible Automation certification program.

✓ meet Red Hat quality standards, bundled with a comprehensive and self-documented test suite.

Red Hat CloudForms providers

✓ are designed and integrated in accordance to Red Hat's acceptance criteria.

✓ are maintained and supported with L2 and L3, integrated into Red Hat support services.

✓ are aligned with Red Hat development life-cycle, thoroughly tested and well-documented.

Long-term support

Quality by design

Consulting

XLAB Steampunk

We specialize in extending Red Hat automation and management products. Since 2016 we've been actively contributing to ManageIQ, the open source project for Red Hat CloudForms. Our team has developed Amazon Elastic Block Storage and Amazon Simple Storage Service providers and is currently maintaining **Redfish, Nuage Networks Virtualized Services Platform** and **VMware vCloud Director** providers. Collaboration with Red Hat, its partners and the open source communities gives us a strong know-how and makes us a reliable partner.

Close partnership with Red Hat

Agile and solution-oriented

Strong expertise

"XLAB has been a valuable partner to Red Hat and an active contributor in the ManageIQ and Ansible communities. Its work on ManageIQ providers for software-defined networking, Redfish enabled infrastructure, and cloud platforms have helped to further extend the powerful capabilities of Red Hat CloudForms to manage across hybrid infrastructure."

Thomas Anderson, senior director, Management, Red Hat

"We recommend XLAB as one of the most professional and capable software development organizations we have done business with. We find them to be incredibly humble and experts in all things Open Source. Beyond producing high quality software, XLAB provides a breadth of industry-leading product and architectural knowledge that is constantly applied through the entire product development life cycle. This results extremely stable and highly-optimized software for our customers."

Ian Evans, principal solutions architect, WWT

"Nuage Networks is engaged with XLAB for various design & development projects that rely on XLAB's in-depth technical knowledge and development agility to fulfil our requirements. XLAB's ability to quickly and expertly come up-to-speed on new technologies and develop integrations that leverage them have exceeded our initial expectations and enabled Nuage Networks to deliver our CloudForms integration."

Philippe Dellaert, Product Line Manager, Nuage Networks
